

About Swati AG

Swati AG has been set up in the canton of Zug in 2019, with a vision to engage with European innovation for the world, to facilitate as a golden triangle between credible Indian Manufacturing, European Innovation & Global markets.

Our business has two main pillars. The first is, world class manufacturing spread between Indian cost-effective high credibility platform and cutting-edge technology & research out of Europe. The second pillar being intelligent business models diversifying risks between large volume key pharmaceutical ingredients to strategic product portfolio of steroids and high potency hormones, to re-purposing of drugs which give access to huge global markets and growth potentials. With its fully backward integrated platforms of starting material & key intermediates to fully forward integrated to finished dosages, clinical studies, and brand selling, we have the perfect balance of risk mitigation and high growth.

Swati AG believes in the bioeconomy model for sustainable production of high value products to be utilized in pharmaceuticals and nutraceuticals. Pentosan Polysulfate is Swati AG's flagship plant-derived product that is proof of success of the bioeconomy model in a pharmaceutical environment. Swati is now setting up a manufacturing site in Europe for production of polysaccharides and other products of natural origin and is collaborating with partners sharing this ideology.
