

Your partner in multi-omics solutions

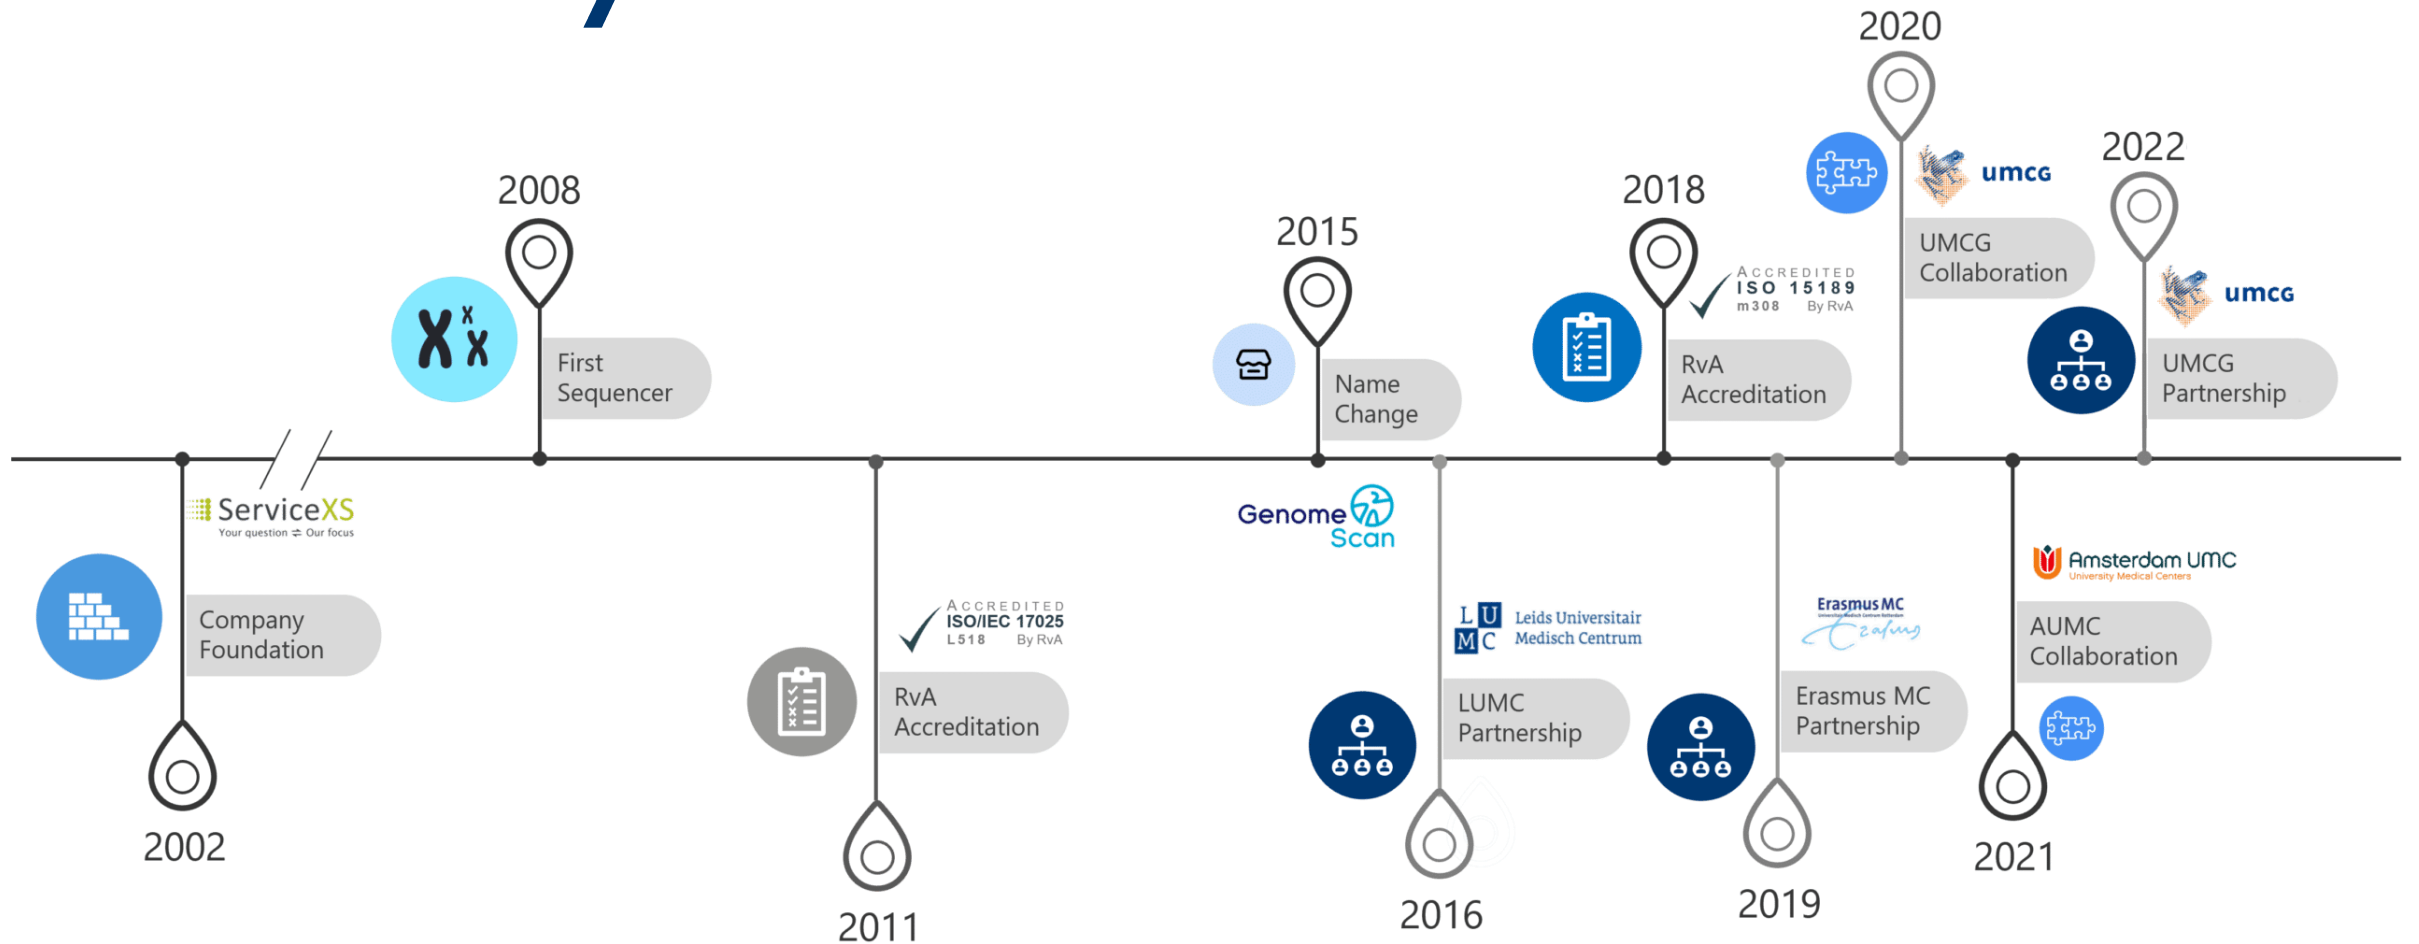

Utilizing state-of-the-art technologies including Next Generation Sequencing (NGS), GenomeScan makes research, diagnostics, and therapeutics development

Better. Faster. Affordable.

January 2024, Leiden, The Netherlands

Our history

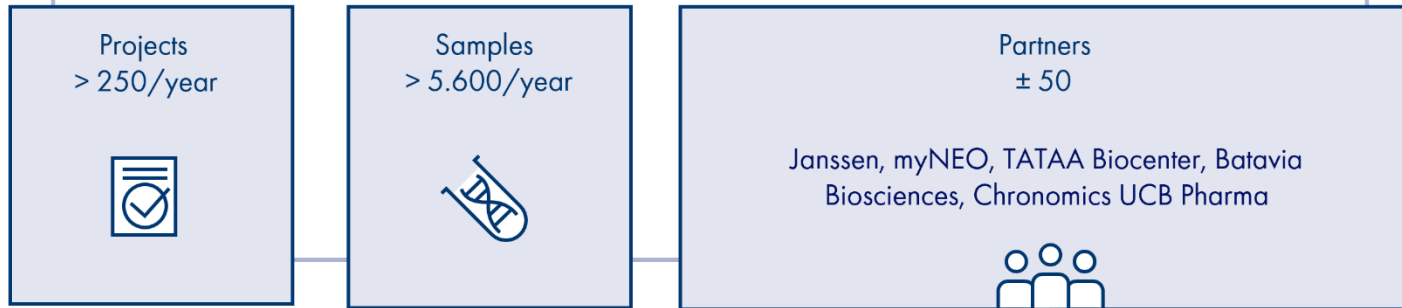

Our team

- United by our passion to make a difference, our team brings scientific and business experts together.
- We are driven by integrity and our commitment to provide researchers and clinicians with the highest quality results.
- We are proud of our work. But we also know how to have fun together!

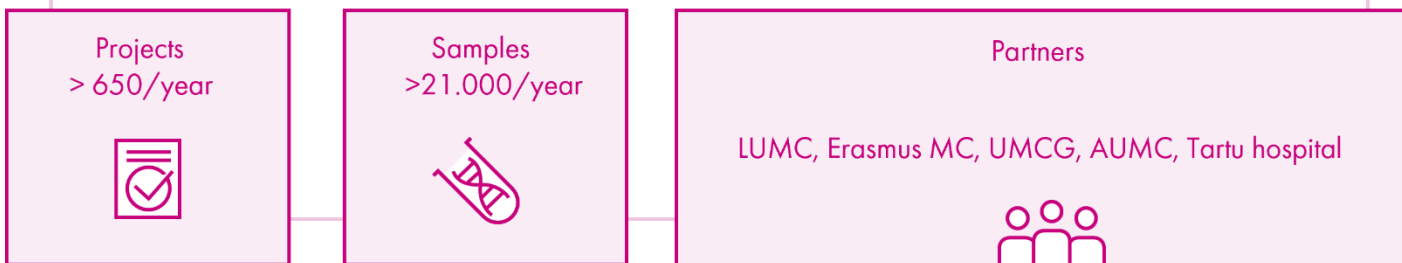

GenomeScan in numbers

Pharmaceutical and Biotechnology Companies

How we stand out

Quality

- ISO/IEC 17025 (L518)
- ISO 15189 (M308)

Capabilities

- Short read
- Long read

illumina® PacBio

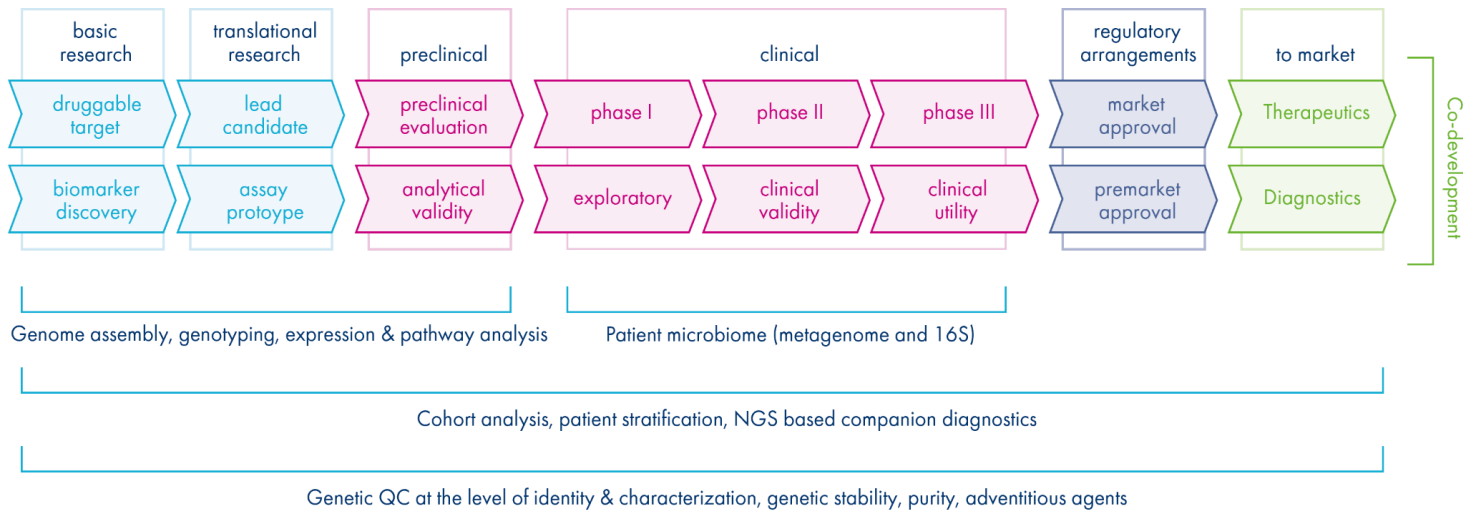

Oxford NANOPORE Technologies Olink

Expertise

- Challenging samples (FFPE, liquid biopsy, ultra-low)
- Bioinformatics (proprietary data analysis pipelines)
- Flexible support (project design & management)

Trusted long-term partner

- Research and diagnostics solutions through the entire pipeline
- Enabling therapeutics / diagnostics co-development programs
