The power of international collaboration

Since 2021, the Swiss Biotech Day has grown by 25-40% every year and has become a premier global biotechnology conference for life science professionals, fostering international collaboration and impactful partnerships.

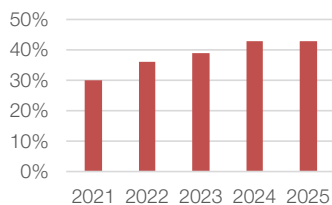

In 2025 it attracted more than 3,000 participants from 49 countries, including 25 international delegations. The key audiences are biotech leaders, global biotech investors, pharma representatives, translational academic research groups, and global CROs/CDMOs.

Join the Swiss Biotech Day to network, exchange ideas, and explore advances in R&D, manufacturing, data management, AI, talent development, and innovative financing. In addition, the embedded Global Village provides international delegations with a platform to strengthen their ties with the Swiss biotech hub to promote cross-border investments, public-private partnerships, R&D collaborations, and the exchange of best practices.
